1 Introduction

The financial resources technical memo of the Florida-Alabama Transportation Planning Organization (FL-AL TPO) serves as an analysis of financial resources available for use in the 2045 Long Range Transportation Plan (LRTP) Update and the associated Cost Feasible Plan. The Cost Feasible Plan serves as an implementation tool to policy and decision makers. This element provides an overview of both existing and forecasted estimates for funding resources at the federal, state, and local level, based on historical trends of current transportation revenue sources as prepared by the Florida Department of Transportation (FDOT) and the Alabama Department of Transportation (ALDOT). Financial projections are based on growth and inflation estimates in the Northwest Florida and Southwest Alabama Region through 2045.

This overview also provides financing opportunities available to the Florida-Alabama TPO and its member municipalities and agencies, including the State of Florida and the State of Alabama that reside in the Metropolitan Planning Area of the Florida-Alabama TPO. The Florida-Alabama TPO consists of Escambia and Santa Rosa counties in Florida, as well as the city of Orange Beach, and the unincorporated community of Lillian in Baldwin County, Alabama.

The map of the Florida-Alabama TPO area can be seen in Figure 1.
Figure 1. Florida – Alabama Transportation Planning Area
2 Existing Revenue Sources

This section references revenue sources that are already available for the use of financing. Table 1 shows revenue sources and assumptions through 2045.

</tr>
</tbody>
</table>

* Note all growth rates show nominal, or year of expenditure, dollar figures. Consistent with REC assumptions, a constant annual inflation rate of 2.60% is projected forward indefinitely. Therefore, an assumption of nominal growth of 1.93% signifies a real decline of about 0.65% per year.

2.1 Federal

Federal funding for the Florida-Alabama TPO comes from a variety of sources. Many federal funding opportunities come from the Federal Highway Administration (FHWA) and the distributions that come from their Federal Highway Trust Fund.

2.1.1 FAST Act

The Fixing America’s Surface Transportation (FAST) Act was signed into law by President Obama on December 4, 2015. This occurred after the release of the Florida-Alabama TPO 2040 LRTP and therefore could not be considered as a revenue source prior to the 2045 Update. The FAST Act funds surface transportation programs such as Federal-aid highways. The FAST Act builds from the previous Moving Ahead for Progress in the 21st Century (MAP-21) Act.
The FAST Act aims to improve mobility on America’s highways, create jobs and support economic growth, and accelerate project delivery and promote innovation.²

The FAST Act includes funding for competitive grant programs distributed through the Federal Transit Administration (FTA) for a variety of transportation related projects such as buses and bus facilities, innovative transportation coordination, workforce training, and public transportation research activities. These grants are further discussed in the Financing Options section of the Financial Resources Technical Report. The Federal Highway Administration (FHWA) also distributes funding into the Highway Account and the Mass Transit Account. Table 2 shows Federal Highway-User Fees implemented at the time of writing.

2.1.2 National Defense Authorization Act
The National Defense Authorization Act authorizes appropriations to the Department of Defense for the fiscal year in which it is set. This includes appropriations for: (1) Procurement, including helicopters, combat vehicles, weapons, aircraft, shipbuilding and conversion, and missiles; (2) Research, Development, Test, and Evaluation; and (3) Operation and Maintenance. Additionally, the bill authorizes programs for funding to state and local governments for infrastructure development that includes transportation infrastructure, such as the Defense Community Infrastructure Program. The Defense Community Infrastructure Program is addressed in Section 5.6.7.

2.1.3 Federal Fuel Taxes
The first federal fuel tax in the United States was adopted with the Revenue Act of 1932 at a tax of 1 cent per gallon. Since 1993, the federal gas tax is 18.4 cents per gallon, with diesel fuel at 6 cents higher, being taxed at 24.4 cents per gallon. Revenue from federal fuel taxes are deposited into the Federal Highway Trust Fund, which has several accounts within it. A majority of the funding is used for road construction and maintenance. Funds from the Federal Highway Trust Fund are distributed to states through formula grants and discretionary allocations by FHWA. Figure 2 represents 2019 federal tax rates for fuel.

---

Figure 2. 2019 Federal Fuel Tax Rates

2.1.4 Federal Transit Administration

The Federal Transit Administration (FTA) provides state-by-state allocations of funding. The Table 3 and Figure 3 show the breakdown of funding to the state of Florida and the state of Alabama (Figure 4) in fiscal year (FY) 2019.

Section 5307 + 5340 - Urbanized Area, $269,654,128

2.2 State

Existing transportation revenue sources are listed in the sections below.

2.2.1 Alabama Fuel Sales Tax

The Rebuild Alabama Act was signed into law by Alabama Governor Kay Ivey on March 12, 2019. Beginning on September 1, 2019, the gas and undyed diesel excise taxes that are currently in place will increase by 6 cents per gallon to 24 cents per gallon for gas and to 25 cents per gallon of undyed diesel. The next increase will be an additional 2 cents per gallon on gas and diesel on October 1, 2020. The following year, on October 1, 2021, another 2 cents per gallon will be levied on gas and diesel fuel. On October 1, 2023, and every other July 1st after that date, the gas and undyed diesel excise tax rate will be adjusted by the percentage change in the yearly average of the National Highway Construction Cost Index and rounded to the nearest whole cent with the increase or decrease of the excise tax rate not exceeding 1 cent per gallon. The revenue of this tax will be used primarily for road and bridge projects across the state, expecting to be worth $32 million for each 1 cent of the tax.

2.2.2 Florida Fuel Sales Tax

Florida fuel taxes are administered by the Florida Department of Revenue. Florida state sales tax is 14.1 cents per gallon as shown in Figure 5. Fuel is defined as motor fuel, diesel fuel, aviation fuel, and natural gas fuel.

---

Qualified entities in the state of Florida are provided refunds that have purchased and used tax-paid fuel for an exempt purpose. Common refund claims include tax-paid:

- Aviation fuel sold to the federal government.
- Aviation fuel used by air carriers.
- Diesel fuel used by motor coaches during idle time.
- Fuel exported out of Florida.
- Fuel purchased by foreign diplomats at retail outlets.
- Fuel purchased by sovereign nations.
- Motor and diesel fuel used by local government users, on road.
- Motor and diesel fuel used by mass transit system providers, on road.
- Motor and diesel fuel used by non-public schools.
• Motor fuel used for agricultural, aquaculture, commercial fishing, or commercial aviation purposes.
• Motor or diesel fuel sold to the federal government in quantities of 500 gallons or more.
• Pollutants exported, bunker into marine vessels, or converted to a solvent mixture.
• Undyed diesel fuel mixed with dyed diesel fuel in error.
• Undyed diesel fuel purchased by farmers for agricultural purposes.
• Undyed diesel fuel used for off-road or other exempt purposes.

2.2.2.1 Alternative Fuel Taxes and Fees
Alternative fuels are fuels that are non-conventional, such as propane, butane, other liquefied petroleum gases, and compressed natural gases. These fuels were a small part of the total fuel consumption in the state, with receipts from these fees amounting to less than $1 million annually. As of 2013, the Florida Legislature passed an exemption on alternative fuels, stating that alternative fuels are exempt from taxation from January 1, 2014 to January 1, 2024.

2.2.3 State Comprehensive Enhanced Transportation System Tax
Adopted on January 1, 1991 by the 1990 Florida Legislature, the State Comprehensive Enhanced Transportation System (SCETS) Tax was created as an additional excise tax on all highway fuels. SCETS is used for at least 15% of FDOT receipts dedicated for public transportation. Any remainder of funds can be used for legitimate state transportation purpose. As of 2019, the SCETS Tax rate is 7.8 cents per gallon as shown in Figure 5. SCETS tax is indexed from the general rate of inflation, and the SCETS tax rate for both gasoline and diesel fuel in each county adjusted proportionately to the Consumer Price Index (CPI) changes from the previous 12-month period. Revised rates are applicable for an entire calendar year.

2.2.4 Documentary Stamp Tax
The Florida Department of Revenue administers the collection of revenue from documentary stamp taxes, which is divided between the General Revenue Fund and various trust funds. Documentary stamp tax is levied on documents such as deeds, stocks and bonds, notes and written obligations to pay money, mortgages, liens, and other cases of
indebtedness. There are two taxes imposed on different bases at different tax rates for documentary stamp taxes. The tax on deeds and documents related to real property is at a rate of 70 cents per $100. Certificates of indebtedness, promissory notes, wage assignments, or retail charge account agreements are taxed at a rate of 35 centers per $100.

In 2014, voters in the state of Florida approved an amendment to the Florida Constitution that requires 33% of documentary stamp tax revenue to be transferred to the Land Acquisition Trust Fund and expended for specific environmental purposes. After that required 33% of revenue is distributed to the Land Acquisition Trust fund, the lesser of either 24.18442% or $541.75 million in each FY is paid to the State Treasury to the credit of the State Transportation Trust Fund (STTF).

Specific amounts of documentary stamp taxes are to be used within certain programs, such as the New Starts Transit Program, the Small County Outreach Program, the Strategic Intermodal System (SIS), and the Transportation Regional Incentive Program (TRIP).\(^\text{12}\)

### 2.2.5 Fees

Fees implemented by the state of Florida and state of Alabama are included in this section.

#### 2.2.5.1 Florida Rental Car Surcharge

Imposed in 2011 by the Florida Legislature, the Florida Rental Car Surcharge is imposed on the lease or rental of motor vehicles designed to accommodate less than nine passengers and on the use of these vehicles by members of a car-sharing service.\(^\text{13}\) This rental car surcharge is $2 per day or for any part of a single day, or $1 per use by members of a car-sharing service.

The surcharge does not apply to the lease or rental of:

- Motorcycles
- Mopeds
- Trucks
- Trailers
- Recreational vehicles
- Van conversions

Rental dealers are required to separately state the surcharge on the sales invoice and include the surcharge in the amount subject to sales tax. 80% of the proceeds of the surcharge are deposited in the STTF, 15.75% are deposited in the Tourism Promotional Trust Fund, and 4.25% are deposited into the Florida International Trade and Promotion Trust Fund. 14

Currently the revenue from the Florida Rental Car Surcharge is $867.5 million between fiscal years 2018 and 2023.15

2.2.5.2 Motor Vehicle Initial Registration Fee

Originally called the “New Wheels on the Road” Fee, the Initial Registration Fee affects those who own vehicles that add net additions to the state’s registered vehicle stock. This fee is only applied to automobiles, light trucks, and certain recreational vehicles. Of the total $225 Initial Registration fee, 85.7% or $193 of that goes to the STTF.

2.2.6 Breakdown of Taxes and Fees

A breakdown of taxes and fees deposited in the STTF in Florida for FY2018 in millions is provided in Figure 6.

---

Figure 6. State Taxes and Fees Deposited in STTF FY2018 (millions)

- Fuel Taxes, $2,294,000,000
- Motor Vehicle License Related Fees, $1,190,000,000
- Documentary Stamp Tax, $297,000,000
- Local Option Distribution, $46,000,000
- Rental Car Surcharge, $138,000,000

2.3 Transportation Authorities

2.3.1 Toll Revenue

There are three toll bridges within the Florida-Alabama TPO area. These bridges are the Bob Sikes Bridge, the Garcon Point Bridge, and the Orange Beach Toll Bridge.\(^\text{17}\)

The Bob Sikes Bridge, also referred to as the Pensacola Beach Bridge, is a toll bridge in Pensacola Beach, Florida. The Bob Sikes Bridge was built in 1973 by FDOT. This bridge collects 1 dollar per vehicle which generates approximately $3 million a year from SunPass, and toll-by-plate.\(^\text{18}\) Cash collection was discontinued in 2020. The original toll of the bridge was 35 cents. However, by increasing the toll to 1 dollar, Escambia County was able to buy the bridge from the state of Florida in 2004. While the toll revenue on the Bob Sikes Bridge only accounts for 1 percent of Escambia County’s revenue, the majority of the money goes towards a Capital Improvement Revenue Bond debt that was issued in 2002. The Bond was used to widen the Pensacola Beach main road, Via de Luna, to a four-lane road, and will not be paid off until 2031. The rest of the toll revenue pays for the toll booth works, bridge maintenance, payments to SunPass for the equipment, and towards a reserve account for when the bridge needs to be replaced.\(^\text{19}\)

The Garcon Point Bridge connects Interstate 10 and US-98 in Santa Rosa County. The Garcon Point Bridge was constructed by the Santa Rosa Bay Bridge Authority, funded by bonds from private investors, and opened to traffic in 1999. The State of Florida currently maintains and operates the bridge, and revenue repays the construction bondholders. Since 2011, the one-way toll price has been $3.75.\(^\text{20}\) In response to a court order, on March 1, 2020, it was increased

to $5.00 per two-axle vehicles, one way for non-Sunpass holders. The Sunpass toll rate is $4.50 for two-axle vehicles and an additional $4.50 for each additional axle, one way.\textsuperscript{21} Between October 2015 and January 2016 the bridge collected over $1,731,578.03 in total revenue from cash, SunPass, and rebates, coming from over 480,155 vehicles. This funding is used to pay off the debt that was occurred from the bridge’s initial construction.

The Orange Beach Toll Bridge, also referred to as the Foley Beach Express, is a toll bridge in Baldwin County, Alabama. The price of tolls is $2.75 for vehicles with 2 axels, $3.75 for vehicles with 3 axels and so on. The tolls may be paid through cash, credit card, and toll-by-plate. Users of the Orange Beach Toll Bridge are also eligible to buy unlimited passes for a specific duration of time, from fourteen days up to twelve months. The City of Orange Beach receives 30 cents for every car that passes through the toll bridge.\textsuperscript{22}

\section*{2.3.2 Community Redevelopment Agencies}

\subsection*{2.3.2.1 Escambia County Community Redevelopment Agency}

Established by the Escambia County Board of County Commissioners in 1995, the Escambia County Community Redevelopment Agency (CRA) primary purpose is to revitalize and enhance the quality of life within the CRA areas by encouraging private sector reinvestment, promoting economic development, and providing public sector enhancements.\textsuperscript{23} The CRA provides plans for nine designated districts in the redevelopment area. The nine redevelopment districts are Atwood, Barrancas, Brownsville, Cantonment, Englewood, Ensley, Palafox, Oakfield, and Warrington.

The Escambia County CRA writes and implements redevelopment plans, administers commercial and residential grant programs, provides project management for capital

improvement projects, and encourages infill reinvestment and acquisition, while also administering the Brownfield Redevelopment Program and the Safe Neighborhood Program.

In order to remedy the persistent conditions of blight that have been identified in the development districts, the Escambia County CRA provides services and support to enhance the quality of life within these areas. This blight may include substandard and inadequate structures, infrastructures, and/or a lack of affordable housing. Escambia County encourages private sector investment, promotes economic development, and provides public sector enhancements within these areas.

2.3.2.2 City of Pensacola Community Redevelopment Agency

The Pensacola Community Redevelopment Agency was established on September 25, 1980 by the Pensacola City Council. They determined that there was a need for a redevelopment agency to rehabilitate, conserve, and implement the development and revitalization of a blighted area in the city. The Community Redevelopment Agency is charged with

- Eliminating and preventing the development or spread of slum and blight within its designated areas
- Rehabilitating and conserving its designated areas
- Affordable housing, whether for rent or for sale, to residents of low or moderate income, including the elderly
- Reducing and preventing crime through strategies such as community policing innovations
- Preparing and administering redevelopment plans to carry out the activities above.

A redevelopment trust fund may be established for each community redevelopment area to finance or refinance community development as authorized by each area’s redevelopment plan. There are three revenue producing community redevelopment areas exist within the greater Pensacola Inner City Community Redevelopment Area. These are the Tax Incremental Financing (TIF) districts, known as the Urban Core Community Redevelopment Area/TIF District, the Westside Community Redevelopment Area/TIF District, and the Eastside Neighborhood – Urban Infill Community Redevelopment Area/TIF District. Annual funding of the redevelopment trust fund for each respective TIF district is 95% of the difference between the amount of property taxes levied in the district each year and the amount of property taxes that would
have been produced in the district prior to establishment of the trust fund (during the "base year"). When the each respective trust fund was established, a 'snapshot' of the base year was taken of the district's levied property taxes. As capital improvements and other investments take place within the district, taxable property values rise. The difference ("increment") between the original property taxes levied and current taxes levied is collected by the taxation authority and deposited in the respective trust funds.

2.4 Local

Local sources of funding can come from a county or a city/municipal level in both Florida and Alabama.

Figure 7. 2019 Florida Fuel Tax Rates at Local Levels

2.4.1 Constitutional Fuel Tax

The Florida Department of Revenue collects Constitutional and county gas taxes and transfers the proceeds once a month to the State Board of Administration (SBA) for distribution to counties. The SBA manages, controls, supervises and distributes the taxes collected. The SBA deducts administrative costs from the collected taxes and calculates a monthly allocation for each county. Once proceeds for every county have been allocated, the revenues are distributed to each county’s board of county commissioners to be used for the intended purposes. The Constitutional Fuel tax occurs on motor fuel and diesel fuel at 2 cents a gallon as shown in Figure 7.

2.4.2 County Fuel Tax

County Fuel Taxes are distributed to counties through the same formula as the Constitutional Fuel Tax and is levied under 206.41, F.S. The County Fuel tax occurs at 1 cent a gallon as shown in Figure 7 and may be used for any legitimate transportation purpose within the county.

2.4.3 Municipal Fuel Tax

The Municipal Fuel Tax maybe be used for any legitimate transportation purpose located within a municipality, and is levied at 1 cent a gallon as shown in Figure 7. Revenues from this tax are transferred into the Revenue Sharing Trust Fund for Municipalities, and distributed in accordance with the criteria listed in Chapter 218 of the Florida Statutes. This revenue is combined with other non-transportation revenues.26

2.4.4 Local Option Fuel Taxes

Local Option Fuel Taxes, previously called Local Option Gas Taxes (LOGT), were developed by the Florida Legislature in 1983. Up to 11 cents per gallon in total may be levied to help fund transportation projects in an area from Local Option Fuel Taxes. This fuel tax is broken up into two different taxes, the first LOGT and the second LOGT, which was established in 1993. The first LOGT can be levied from 1 cent to 6 cents, and the second LOGT may be levied from 1 cent to 5 cents as shown in Figure 7.

In total, Escambia County has an 11 cents a gallon locally imposed motor fuel tax, while Santa Rosa County has a 12 cents per gallon locally imposed motor fuel tax. Both counties include the Ninth-Cent Gas Tax in this total, which is discussed further in the section below.

### 2.4.5 Ninth-Cent Gas Tax

The ninth-cent gas tax was established in 1972 by the Florida Legislature. This tax is limited to one cent per gallon on highway fuels. In 1993, the Florida Legislature allowed for a county government to impose the ninth-cent gas tax by a majority plus one vote of the county commission, without holding a referendum. Ninth-cent gas tax collected by counties is not required to be shared with municipalities unless mutually agreed upon, and must be used for county or municipality transportation purposes. Escambia and Santa Rosa County currently charge a ninth-cent gas tax on all motor fuels as shown in Figure 7.

### 2.4.6 Local Option Sales Tax

The Local Option Sales Tax, also referred to as the Local Government Infrastructure Surtax, can be levied by county governing bodies at a rate of 0.5% up to 2.5%. It may be implemented through a county-wide referendum. This tax applies to all purchases subject to the regular sales tax up to the first $5000. This $5000 cap applies to any item of tangible personal property, and does not apply to rentals of real property, transient rentals, or services.

Escambia County first imposed a local option sales tax of 1% on June 1, 1992 to May 31, 1999. This tax has been extended multiple times since the initial implementation, with the latest local option sales tax of 1% expiring on December 31, 2028. A local option sales tax of 0.5% was passed by Santa Rosa County voters on August 30, 2016, and went into effect January 1, 2017. This tax will be implemented over five years and will generate an estimated $35 million to fund improvement projects, with 52% of the target percentage allocations being for transportation.

---

29 2018 Local Government Financial Information Handbook pg. 152
and drainage projects. Santa Rosa County may continue to carry this local option sales tax through referendum after the five year time limit is over.

### 2.4.7 City and Municipal Taxes and Fees

#### 2.4.7.1 Pensacola Municipal Parking Facility Space Surcharges

Pensacola’s Downtown Improvement Board (DIB) charges different rates to park on downtown Pensacola’s on-street parking spaces, in parking lots, and in the parking garages.\(^{30}\) Currently, the rates are $0.50 per hour for on-street parking, $0.50 per hour in the North Palafox and Tarragona parking lots, $1.00 per three hours in the Jefferson Street parking garage. Sundays are free.

Revenue generated from downtown parking, as well as revenue created from citations issued in downtown spaces, are used to pay for local parking improvements and enhancements. These enhancements include better lighting, improved accessibility such as curb ramps and striping, enhanced security, cleaning, and repairs.

#### 2.4.7.2 Transportation Impact Fees

Impact fees are imposed by local governments on new or proposed development projects that pay for all or part of the costs it takes to provide public services and new infrastructure to the development. Impact fees help most the costs of public facility financing off of the taxpayers to those who utilize and benefit the new development being implement. Santa Rosa County had collected transportation impact fees in the past, however in FY2016 the Board of County Commissioners voted to rescind the impact fee resolution, to be revisited at budget workshops in the future.

### 2.4.8 Lodging Tax – Orange Beach

In September 2017, the City of Orange Beach approved a 2% lodging tax increase from 11% to 13%. The 2% increase is allocated to traffic and infrastructure.\(^{31}\)

---

3 Projected Revenue (2020 - 2045)

3.1 Summary of Federal and State Revenues
The Florida Department of Transportation (FDOT) District 3 Planning office provided estimates of state and federal transportation funding for the TPO for years 2020-2045. The forecast categorizes FDOT’s major programs into capacity and non-capacity programs. It should be noted that this is not the total amount of funds that are spent on the transportation system. The vast majority of transportation funds are spent on operations and maintenance of the existing system. These are programs such as roadway surfacing and safety. Once all of the maintenance obligations are satisfied, the remaining funds are available for capacity projects.

Forecasted revenues for capacity programs are used to expand existing transportation systems that support economic competitiveness and improve quality of life. FDOT capacity improvement programs are described below and further in Appendix B.

3.2 Capacity Programs
Capacity programs include each major FDOT program that expands the capacity of existing transportation systems (such as highways and transit).

SIS Highways Construction & ROW - Construction, improvements, and associated right of way on SIS highways (i.e., Interstate, the Turnpike, other toll roads, and other facilities designed to serve interstate and regional commerce including SIS Connectors). Eligible activities under this program include construction, improvement, and associated right-of-way for roads that are classified as part of the SIS. Examples of roadways that are part of the SIS include:

- Interstate 10
- Interstate 110
- Airport Boulevard
- State Road 87
- US Highway 29.
**Other Arterial Construction/ROW** – Construction, improvements, and associated right of way on State Highway System roadways not designated as part of the SIS. It also includes funding for local assistance programs such as the Transportation Regional Incentive Program (TRIP), and the County Incentive Grant Program (CIGP).

**Aviation** - Financial and technical assistance to Florida’s airports in the areas of safety, security, capacity enhancement, land acquisition, planning, economic development, and preservation.

**Transit** – Technical and operating/capital assistance to transit, paratransit, and ridesharing systems.

**Seaport Development** - Funding for development of public deep-water ports projects, such as security infrastructure and law enforcement measures, land acquisition, dredging, construction of storage facilities and terminals, and acquisition of container cranes and other equipment used in moving cargo and passengers.

**Transportation Management Area Funds (TMA)** – Areas with a population over 200,000 qualify for TMA funds. These are areas that must comply with section transportation planning requirements.

Descriptions of the capacity programs are further explained in Table 3 of the 2045 Revenue Forecast for FL-AL TPO (Appendix B).
3.3 Non-Capacity Programs

Non-capacity programs refer to FDOT programs designed to support, operate and maintain the state highway system: safety, resurfacing, bridge, product support, operations and maintenance, and administration. In a typical Work Program cycle the non-capacity dollars make up approximately 50-60% of the Work Program’s budget. Non-capacity programs are explained further in Table 10 of the 2045 Revenue Forecast (Appendix B).

Some of the characteristic activities include the following:

- **Safety Programs**
- **Resurfacing Programs**
- **Bridge Programs**
- **Product Support**
- **Operations & Maintenance Program**
- **Administration and Other.**

**Safety Programs** - Includes the Highway Safety Improvement Program, the Highway Safety Grant Program, Bicycle/Pedestrian Safety activities, the Industrial Safety Program, and general safety issues on a Department-wide basis.

**Resurfacing Programs** - Resurfacing of pavements on the State Highway System and local roads as provided by state law.

**Bridge Programs** - Repair and replace deficient bridges on the state highway system. In addition, not less than 15% of the amount of 2009 federal bridge funds must be expended off the federal highway system (e.g., on local bridges not on the State Highway System).

**Product Support** - Planning and engineering required to “produce” FDOT products and services (i.e., each capacity program; Safety, Resurfacing, and Bridge Programs).

**Operations & Maintenance Program** - Activities to support and maintain transportation infrastructure once it is constructed and in place.
**Administration and Other** - Resources required to perform the fiscal, budget, personnel, executive direction, document reproduction, and contract functions. Also includes the Fixed Capital Outlay Program, which provides for the purchase, construction, and improvement of non-highway fixed assets (e.g., offices, maintenance yards). The “Other” category consists primarily of debt service.

### 3.4 Alabama Revenue

ALDOT provided a Memorandum dated January 25, 2019 ([Appendix C](#)). The memo is for the TPOs to use for development of their revenue forecasts for the Long Range Transportation Plans.
4 Funding Summaries

Listed in the tables below are the projections provided by FDOT and ALDOT for the FL-AL TPO to use in development of the 2045 Florida – Alabama Long Range Transportation Plan.

*Estimates provided by the Alabama Department of Transportation-Montgomery Office.
5 Financing Options for Transportation

5.1 Bonds

The State of Florida Division of Bond Finance was created by the Florida Legislature in 1969. Their purpose is to issue bonds on behalf of local governments and agencies located within the State of Florida.\(^{34}\)

Currently, the Florida Division of Bond Finance issues three types of bonds: general obligation bonds, revenue bonds, and appropriation-based bonds. The Florida statutes defines General Obligation Bonds as:

“any bonds which are secured by, or provide for their payment by, the pledge, in addition to those special taxes levied for their discharge and such other sources as may be provided for their payment or pledged as security under the ordinance or resolution authorizing their issuance, of the full faith and credit and taxing power of the county or municipality issuing such bonds and for the payment of which recourse may be had against the general fund of such county or municipality.”\(^{35}\)

Revenue bonds are secured solely by a pledge revenue stream. An example of this would be specific tax revenues such as documentary stamp taxes, or specific non-tax revenues such as highway tolls. Appropriation-based bonds are secured by the commitment of the State of Florida to pay the debt service on the bonds through annual appropriation by the Florida Legislature.\(^{36}\)

5.1.1 General Revenue Bonds

Revenue bonds are secured solely by a pledge revenue stream. An example of this would be specific tax revenues such as documentary stamp taxes, or specific non-tax revenues such as highway tolls. Appropriation-based bonds are secured by the commitment of the State of

\(^{34}\) https://www.sbafla.com/bondfinance/Home/About-the-Division-of-Bond-Finance

Florida to pay the debt service on the bonds through annual appropriation by the Florida Legislature.37

5.1.2 Grant Anticipation Revenue Vehicle Bonds
Grant Anticipation Revenue Vehicle (GARVEE) Bonds are bonds that are sold by States and backed by and repaid with specific Federal-aid funds.38 They are generally tax-exempt. These bonds have both advantages and disadvantages, such as the advantage of acceleration of construction, low interest for new money bonds and refinancing, and the leveraging of Federal funds. However, disadvantages include the cost of interest and the loss of future flexibility. GARVEE Bonds are used to finance transportation projects that are eligible to receive federal-aid highway funds.39

Both Alabama and Florida are able to apply for GARVEE Bonds. Alabama currently uses GARVEE Bonds for transportation projects.40 Florida has recently gained the ability to use GARVEE Bonds through legislation. FDOT plans to issue $1.29 billion in GARVEE Bonds in FY 2026-27.

5.1.3 Florida Transportation Revenue Bond Programs
The Florida Transportation Revenue Bond Programs are revenue bonds issued by the Florida Division of Bond Finance on behalf of the Department of the Financing Corporation.41 Currently there are six distinct bond programs with the Florida Transportation Revenue Bond Programs. These bond programs provide financing for toll roads, seaports, and other methods of transportation.

5.2 Strategic Intermodal System Funding Strategy

The Strategic Intermodal System (SIS) Funding Strategy is a document produced by the FDOT Systems Implementation Office. The SIS Funding Strategy produced three related documents that together identify potential capacity improvement projects that are in various stages of development. The documents include a First Five Year Plan, a Second Five Year Plan, and a Long Range Cost Feasible Plan. The Plans change FYs as time passes. Currently, the First Five Year Plan contains information for multimodal capacity improvement projects from FY2019/2020 to FY 2023/2024. The Second Five Year Plan contains multimodal capacity improvements for FY2024/2025 to FY2028/2029. Finally, the Long Range Cost Feasible Plan encompasses projects on the SIS that are financially feasible during the last 15 years of the State’s Long Range Plan, so the current Cost Feasible Plan has projects from FY2029 to FY2025. Projects on each list can be moved into different Plans or removed as funding becomes available or if revenues fall short of projections.

5.3 Tax Incremental Financing (TIF)

Tax increment financing (TIF) is a public financing method that is used as a subsidy for redevelopment, infrastructure, and other community-improvement projects. TIF is a method to use future gains in taxes to subsidize current improvements, which are projected to create the conditions for gains above the routine yearly increases which often occur without the improvements. To provide the needed subsidy, the urban renewal district, or TIF district, is essentially always drawn around 100s or 1000s of acres of additional real estate (beyond the project site) to provide the needed borrowing capacity for the project or projects. The borrowing capacity is established by committing all of normal yearly future real estate tax increases from every parcel in the TIF district (for 20–25 years, or more) along with the anticipated new tax revenue eventually coming from the project or projects themselves.

The routine yearly increases district wide along with any increase in site value from the public and private investment generates an increase in tax revenues. This is the “tax increment.” Tax increment financing dedicates tax increments within a certain defined district to finance the debt that is issued to pay for the project. TIF was designed to channel funding toward improvements in distressed, underdeveloped, or underutilized parts of a jurisdiction where
development might otherwise not occur. TIF creates funding for public or private projects by borrowing against the future increase in these property tax revenues.

Another Redevelopment agency in Northwest Florida has used a combination of Tax Increment Financing, Community Development Block Grant and other grant funding sources and partnerships to finance programs and initiatives to fund a walkable community with sidewalks, bike paths, enhanced streetscapes and people-friendly areas. This same approach can be used by Community Development Redevelopment agencies within the Florida-Alabama TPO, which are listed on pages 17 and 18 of this document.

5.4 Transportation Regional Incentive Program

The Transportation Regional Incentive Program (TRIP) was adopted in 2005 by the Florida Legislature as an initiative to improve growth management planning, and the provision of transportation infrastructure, such as regionally significant transportation facilities in “regional transportation areas.” Funding for TRIP comes from the state of Florida from the STTF, documentary stamp taxes fund, and motor vehicle licensing fees. These funds are to provide incentives for local governments, as well as the private sector, to aid in paying for critically needed projects that benefit regional travel and commerce.

To be eligible for funding, projects must:

- Serve national, statewide, or regional functions and act as part of an integrated transportation system
- Be identified in capital improvement elements of the appropriate local government comprehensive plan compliant with Florida Statutes Part II, Chapter 163
- Be included in an MPO LRTP, the STIP, TIP as well as be consistent with local government comprehensive plans
- Be consistent with the Strategic Intermodal System (SIS)

---

43 https://fdotwww.blob.core.windows.net/sitefinity/docs/default-source/content/planning/revenueforecast/revenue-forecasting-guidebook.pdf?sfvrsn=b40e9ddc_0
• Be compliant with local corridor management policies
• Have commitment of additional funding from either local, regional or private matching funds.

In addition to project eligibility, eligible partners must create “regional transportation areas” pursuant to an inter-local agreement, and develop a regional transportation plan that identifies and prioritizes regionally significant facilities. Partner eligibility includes MPOs comprised of three or more counties, two or more continuous MPOs, one or more MPO and one or more contiguous counties that are not members of an MPO, a multi-county regional transportation authority created by or pursuant to law, and two or more contiguous counties that are not members of an MPO.

In order to receive TRIP funding, MPOs should work with their FDOT District offices in developing and documenting information to receive and use these funds. The Florida portions of the Florida-Alabama TPO reside in FDOT’s District 3.

5.5 Public Private Partnerships
Public-Private Partnerships (P3s) involve the private sector in the construction and/or operation of a facility in a manner that allows the government agency to effectively meet its objectives. The Florida Statutes state that no more than 15% of total federal and state funding in any given year for the STTF shall be obligated collectively for projects that are considered P3s.44

5.6 Federal Grants
Federal grants for state and local government, and MPO/TPOs to apply to in Florida and Alabama come from a variety of sources.45,46 The FTA has a variety of formula and competitive grants available. As federal transportation standards change in the future, the grants that go along with them may also change. However, a comprehensive list of competitive grants

available at the current time are listed in the subsections below. Many federal grants are posted and available online via grants.gov.

### 5.6.1 Access and Mobility Partnership Grants

FTA Access and Mobility Partnership Grants seek to improve access to public transportation by building partnerships among health, transportation and other service providers.\(^{47}\) As of 2018, the two funding programs under the Access and Mobility Partnership Grants are the Innovative Coordinated Access and Mobility (ICAM) Grant and the Human Services Coordination Research (HSCR) Grant. These programs are competitive, and provides funding to support innovative projects for the transportation disadvantaged that improves the coordination of transportation services and non-emergency medical transportation services. There is no minimum or maximum grant award amount for either program.

#### 5.6.1.1 Innovative Coordinated Access and Mobility

Eligible applicants are organizations that are also eligible to be recipients and sub-recipients of the Enhanced Mobility for Seniors and Individuals with Disabilities Program, including:

- Designated recipients
- States and local governmental authorities
- Private nonprofit organizations
- Operators of public transportation.

The award funds competitively to finance innovative capital projects for the transportation disadvantaged that improve the coordination of non-emergency medical transportation services. The maximum federal share of project costs is 80%. The applicant provides a local share of at least 20 percent of the net project cost and must document the source of the local match in the grant application.

---

5.6.1.2 Human Services Coordination Research

Eligible applicants include:

- State and local governmental entities
- Providers of public transportation
- Private or nonprofit organizations

Eligible sub-recipients include public agencies, private nonprofit organizations, and private providers engaged in public transportation. The Human Service Coordination Research (HSCR) funding finances operating and capital project expenditures that develop and deploy projects that improve transportation services for targeted populations through methods that effectively and efficiently coordinate human services transportation. The maximum federal share of capital project costs is 80%, and for operating project costs is 50%. The applicant must document the source of the local match in the grant application.

5.6.2 Better Utilizing Investments to Leverage Development Transportation Grants Program

The Better Utilizing Investments to Leverage Development (BUILD) Transportation Grants Program is meant to fund investments in transportation infrastructure including transit.48 BUILD Transportation grants replace the Transportation Investment Generating Economic Recovery (TIGER) grant program. This grant is competitive, and the FTA acts as the administering modal agency for BUILD projects. These projects must directly impact public transportation.

---

5.6.3 Capital Investment Grants Program

The Capital Investment Grants Program is an FTA discretionary grant program that funds transit capital investments, such as heavy rail, commuter rail, light rail, streetcars, and bus rapid transit systems.\(^{49}\)

The Capital Investment Grants Program is composed of three subsections: New Starts, Small Starts, and Core Capacity Improvements Process. The law requires completion of two phases in advance of receipt of a construction grant agreement for the New Starts and the Core Capacity Process projects. These phases are Project Development and Engineering. Small Starts Process projects must have completion of one phase, Project Development, in advance of receipt of a grant agreement. This process is shown in Figure 8.

Figure 8. Capital Investment Grants Program Requirements

---

5.6.4 Community Development Block Grant
The Community Development Block Grant (CDBG) program provides grants to communities to addresses a range of community development needs. The CDBG program is one of the longest running programs through the United States Department of Housing and Urban Development (HUD). The CDBG has a variety of sub-programs within it, such as the CDBG Entitlement Program, the CDBG State Program, and the Neighborhood Stabilization Program.51

5.6.4.1 CDBG Entitlement Program
The CDBG Entitlement Program is a formula-based grant program that is provided annually to entitled cities and counties. These grants are meant to assist in developing viable urban communities by providing housing and suitable living environments, and expanding economic opportunities.

CDBG funds may be used for the acquisition of real property; relocation and demolition of buildings; rehabilitation of residential and non-residential structures; the construction of public facilities and improvements, such as water and sewer facilities, streets, and neighborhood centers; public services; energy conservation and renewable energy sources; and assistance to profit-motivated businesses to carry out economic development and job creation.

In order to apply for a CDBG Entitlement grant, the applicant must be one of the following: a principal city of a Metropolitan Statistical Area (MSA), another metropolitan city with a population of at least 50,000, or a qualified urban county with a population of at least 200,000 (excluding populations of entitled cities).

5.6.4.2 State CDBG Program
The State CDBG Program allows states to award grants to local governments to develop affordable housing, provide services to the most vulnerable communities, and create and retain jobs.

State CDBG funds may be used for the same activities that the CDBG Entitlement funds may be used for. This includes the acquisition of real property; relocation and demolition of buildings; rehabilitation of residential and non-residential structures; the construction of public facilities and improvements, such as water and sewer facilities, streets, and neighborhood centers; public services; energy conservation and renewable energy sources; and assistance to profit-motivated businesses to carry out economic development and job creation. Florida provides State CDBG Program funding through the Florida Small Cities CDBG Program, further explained in Section 5.7.8.

5.6.5 Community Facilities Direct Loan and Grant Program

The Community Facilities Direct Loan and Grant Program is a program offered by the U.S. Department of Agriculture (USDA) Rural Development program. The purpose of the program is to provide funding to assist in the development of essential community facilities in rural areas. An essential community facility is one that provides an essential service to the local community, and is not a private, commercial, or business facility.52

Eligible borrowers and applicants include public bodies, community-based nonprofit corporations and federally-recognized tribes. Cities, villages, townships, and towns (including federally-recognized tribal lands) with no more than 20,000 residents according to U.S. Census Data are eligible for this program.

Funds from the Community Facilities program may be used to purchase, construct, and improve essential community facilities, equipment, or related project expenses. This includes public facilities such as town halls, courthouses, airport hangars, and street improvements. To apply for grants, the applicant must be eligible for grant assistance, provided on a graduate scale with smaller communities with the lowest median household income being eligible for projects with a higher proportion of grant funds.

---

5.6.6 Commuter Rail Positive Train Control Grants
Commuter Rail Positive Train Control Grants are authorized by the FAST Act, and offers funding to states, local governments and transit agencies that operate commuter rail systems to install positive train control systems required under U.S.C 20157 (Implementation of positive train control systems).

Eligible recipients are the recipients of federal grants under 49 U.S.C. Chapter 53, state and local governments, and transit agencies operating commuter rail systems. Eligible activities include the capital costs of installing PTC systems and activities such as back office systems, wayside, communications, and onboard hardware equipment, software, equipment installation, and spectrum acquisition. The federal share of eligible capital costs is 80% of the net capital project costs, unless the grant recipient requests a percentage lower.

5.6.7 Defense Community Infrastructure Program.
As part of the National Defense Authorization Act, the bill authorizes the Defense Community Infrastructure Program.\(^{53}\) This program allows to the Secretary of Defense to make grants, conclude cooperative agreements and supplement funds available under Federal projects administered by agencies other than the DOD to assist states and units of local government to address deficiencies in community infrastructure projects or facilities which are located outside of military installations but which support these same installations, and are owned by the same State of unit of local government. The Secretary must determine that the assistance will enhance military value, resiliency, or military family quality of life at this installation.

5.6.8 Economic Development Administration Disaster Supplemental Funds
The United States Economic Development Administration (EDA) Disaster Supplemental Funds are a cooperative agreement grant meant to assist communities and regions implement long-term economic recovery strategies through projects to address economic challenges in areas where a declaration of major disaster was issued.\(^{54}\) The current Disaster Supplemental Funding is for FY2019, and the major disaster must have been issued within the 2019 calendar year.

Major disasters include hurricanes, typhoons, wildfires, volcanic eruptions, earthquakes, and other natural disasters.

Those eligible to apply for these disaster supplemental funds include city or township governments, state or special district governments, private, public and state controlled institutions of higher education, nonprofits, and federally recognized Tribal governments.

While these funds are economically focused, they may be used for transportation infrastructure as part of the economic recovery strategies from major disasters as described above. As recipients of the FY2018 Disaster Supplemental Funds, the City of Pensacola in Escambia County and the Panama City Port Authority in Bay County, Florida, were able to use the funds for port projects. The City of Pensacola received over $12 million in funding for the construction of a Maintenance, Overhaul, and Repair (MOR) hangar at the Pensacola International Airport. This MOR will provide additional space for a training center for the maintenance technology programs that prepare students for careers in the commercial aviation industry. This will help to enhance the aviation cluster in the region, and help create approximately 1,130 jobs. The Panama City Port Authority received $10 million in funding for the creation of a Biomass Storage Facility. This will provide 20,000 tons of biomass storage, which is vital to the port since the current facility is approaching capacity.

5.6.9 Grants for Buses and Bus Facilities Program

Grants for Buses and Bus Facilities Program makes federal resources available to states and other direct recipients to replace, rehabilitate, and purchase buses and related equipment and technology to construct bus-related facilities. These facilities can include changes and innovations to technology or include low or no emission vehicles or facilities. Funding is provided through competitive grants as well as through formula allocations.

A sub-program, the Low- or No-Emission Vehicle Program, also provides competitive grants for bus and bus facility projects that support low and zero-emission vehicles.

---

Qualified recipients of the Grants for Bus and Bus Facilities Program include those that operate fixed route bus service or those that allocate funding to fixed route bus operators, state or local government entities, and federally recognized Indian tribes that operate fixed route bus services. Sub-recipients include those that receive grant funding under the formula or discretionary programs may allocate amounts from the grant to sub-recipients that are public agencies or private nonprofit organizations engaged in public transportation.

5.6.10 Human Trafficking Awareness and Public Safety Initiative
The FTA Human Trafficking Awareness and Public Safety Initiative that supports the Department of Transportation’s (DOT) Transportation Leaders Against Human Trafficking initiative. This support comes through transit focused industry engagement, education, public awareness and outreach, and research and technical assistance to combat human trafficking in transit. This program also supports the FTA’s operator assault and crime prevention efforts. The operator assault and crime prevention efforts strive to maximize the transit industry’s collective impact to address human trafficking as well as other public safety concerns. There are two grant opportunities as part of the Human Trafficking Awareness and Public Safety Initiative, the Crime Prevention and Public Safety Awareness and the Innovations in Transit Public Safety.

5.6.10.1 Crime Prevention and Public Safety Awareness
Projects that fall under Crime Prevention and Public Safety Awareness must have the goal of developing and distributing technical assistance materials supporting public safety awareness campaigns in transit systems, including crime prevention, human trafficking, and operator assault. Project proposals will be evaluated based on the following set of criteria:

- Ability to meet the goal of the Crime Prevention and Public Safety Awareness project
- Qualifications of key personnel, experience, and knowledge
- Communication, technical assistance, and outreach strategy
- Research and demonstration capacity
- Management approach.

5.6.10.2 Innovations in Transit Public Safety
Projects under Innovations in Transit Public Safety meant to have the goal of developing innovative projects that assist transit agencies with identifying and adapting specific measures
to address public safety in transit systems, such as crime prevention, human trafficking, and operator assault. Applications for the Innovations in Transit Public Safety program must include a statement of purpose which details the needs being addressed, the short- and long-term goals of the project, including the opportunities for future innovation, development, and benefits to riders of public transportation, how the project will improve personal safety in public transit stations and vehicles, and the short- and long-term funding requirements to complete the project and any future objectives of the project. The proposal will be evaluated by the following set of criteria:

- Demonstration of need
- Demonstration of benefits
- Coordination, planning, and partnerships
- Local financial commitment
- Project readiness
- Technical, legal, and financial capacity.

5.6.11 Integrated Mobility Innovation

The Integrated Mobility Innovation (IMI) Program funds projects that show innovative and effective practices, partnerships and technologies to enhance public transportation and its effectiveness, increase efficiency, expand quality, promote safety, and improve experiences for travelers.\(^\text{57}\) There are three interest areas in IMI: Mobility on Demand, Strategic Transit Automation Research, and Mobility Payment Integration. These area interests are meant to explore new business approaches and technology solutions that support mobility, enable communities to adopt innovative mobility solutions that enhance transportation efficiency and effectiveness, and facilitate the widespread deployment of proven mobility solutions that expand personal mobility.

5.6.12 Low- and No-Emission Component Assessment Program

The Low- and No-Emission Component Assessment Program (LoNo-CAP) directly supported the FTA’s mission of ongoing low- and no-emission (LoNo) programs by providing an unbiased assessment of LoNo components used in transit buses, publishing the assessments online, and summarizing them in an annual report to be given to Congress. These component assessments document maintainability, reliability, performance, structural integrity, efficiency, and the noise levels of the components tested.

Institutions of higher education are the only eligible recipients of the LoNo-CAP. These high education institutions must have the capacity to carry out transportation-related advanced component testing and evaluation, with laboratories capable of testing and evaluation, as well as a direct access to or a partnership with a testing facility that is capable of replicating real-world circumstances to be able to test low or no emission components.

The inclusion of this grant is due to the potential cooperation with higher education in the FL-AL TPO area, such as the University of West Florida.

While applications for LoNo-CAP closed on November 28, 2016, there are potential opportunities for future appropriations for funding after FY2020, and/or when the FAST Act is reauthorized.

5.6.13 Low- or No-Emission Vehicle Program

Mentioned previously in the Grants for Buses and Bus Facilities Program section, the Low- and No- Emission Vehicle Program – Section 5339(c) provides funding to state and local governments for the purchase or lease of low- and zero-emission transit buses as well as acquisition, construction, and leasing of required supporting transit facilities. $55 million per year is available until FY2020 under the FAST Act. Allocations of funding are on a competitive basis, from proposals submitted to FTA in response to a Notice of Funding Opportunity (NOFO).

---

Applicants eligible to apply include direct recipients of FTA grants under the Section 5307 Urbanized Area formula program, states, and Indian Tribes. Project eligible include purchasing or lease low- or no-emission buses, acquiring low- or no-emission buses with a leased power source, constructing or leasing facilities and related equipment for low- or no-emission buses (including intelligent technology and software), constructing new public transportation facilities to accommodate low- or no-emission buses, and rehabilitating or improving existing public transportation facilities to accommodate low- or no-emission buses.

5.6.14 Mobility on Demand Sandbox Demonstration Program
The Mobility on Demand (MOD) Initiative was developed to create a transportation system that is multimodal, integrated, automated, accessible, and connected. Personalized mobility is a key feature of this transportation system. With MOD, there is a use of real-time data, on-demand information, and predictive analysis to give transportation choices to travelers that best service their needs and circumstances at the time. Technologies that utilize and leverage MOD allow for a traveler-centric approach to provide better mobility options for all users.

The MOD Sandbox Demonstration Program was created to provide a venue for integrated MOD initiative concepts and solutions are demonstrated in real-world settings with the support of local partnerships.59 FTA seeks to fund project teams to innovate, explore partnerships, develop new business models, integrate transit and MOD solutions, and investigate new technical capabilities. These technical capabilities include incentives for traveler choices, integrated payment systems, and decision support. The MOD Sandbox also provides FTA the opportunity to measure project impacts, and assess how existing policies and regulations upheld by the FTA may help or hinder new service transportation models through the evaluation of project efforts.

Overall, the objectives of the MOD Sandbox Demonstration Program are:

- Enhance transit industry preparedness for MOD
- Assist the transit industry to develop the ability to integrate MOD practices with existing transit service
- Validate the technical and institutional feasibility of innovative MOD business models, and document MOD best practices that may emerge from the demonstrations
- Measure the impacts of MOD on travelers and transportation systems
- Examine relevant public sector and federal requirements, regulations and policies that may support or impede transit sector adoption of MOD.

Projects and activities eligible for MOD Sandbox Demonstration Program are those that lead to the demonstration of innovative MOD and transit integration concepts, and operating the demonstration. Innovative MOD can include planning and developing business models, obtaining equipment and service, and acquiring and/or developing software and hardware to implement the project.

Eligible recipients are those who provide public transportation, such as public transit agencies, state and local government DOTs, and federally recognized Indian tribes. Project partners who are eligible include, but are not limited to:

- Private for-profit and not-for-profit organizations, including shared use mobility providers, and technology system suppliers
- Operators of transportation services, such as employee shuttle services, airport connector services, university transportation systems, or parking and tolling authorities
- State or local government entities
- Other organizations that may contribute to the success of the project team including consultants, research consortia or not-for-profit industry organizations, and institutions of higher education.

80% is the limit of the federal share of project costs under this program.
5.6.15 Passenger Ferry Grant Program
The Passenger Ferry Grant Program – Section 5307 provides funding for projects that support enhancement and revitalization of passenger ferry systems in urbanized areas.60

Activities and projects for eligibility must support an existing ferry service or establish a new ferry service, and repair and modernize ferry boats, terminals, and related facilities and equipment. Funds are also awarded based off of factors such as the age and condition of existing ferry boats, their terminals and related infrastructure, the benefit to riders such as an increase in reliability of services, project readiness, and connectivity to other modes of transportation.

Funding is available to direct recipients of Section 5307 funds, designated recipients, states and federally recognized Indian Tribes that operate a public ferry system.

5.6.16 Pilot Program for Expedited Project Delivery
The Pilot Program for Expedited Project Delivery – 3005(b) allows for FTA to select up to eight capital transit projects for expedited grant awards.61 The projects selected must be supported through a P3, and be operated and maintained by employees of an existing public transportation provider. The federal share must not exceed 25% of the project capital cost.

5.6.17 Pilot Program for Transit-Oriented Development Planning
The Pilot Program for Transit-Oriented Development (TOD) Planning supports the mission of FTA by improving public transportation by providing funding to local communities in order to integrate land use and transportation planning with new fixed guideway or core capacity transit capital investment.62 The planning funded through the program must be comprehensive, and examine ways to improve economic development and ridership, facilitate multimodal connectivity and accessibility, improve transit access for pedestrians and bicyclists, engage the

private sector, identify infrastructure needs, and enable the development of mixed-use land near transit stations.

5.6.18 Public Transportation Innovation
Public Transportation Innovation – Section 5312 was created to provide funding to develop innovative products and services that assist transit agencies in meeting the needs of their customers in new and better ways.\(^6^3\)

Universities and higher education, public transportation systems, state DOTs, non- and for-profit entities, are among some of the few eligible to be a recipient of this funding. This grant is competitive. Projects include research, development, demonstration, and deployment projects, as well as projects that evaluate technology of national significance to public transportation.

5.6.19 Public Transportation on Indian Reservations Program
Public Transportation Indian Reservations Program, also called the Tribal Transit Program, provides funding for capital, operating, planning, and administrative expenses for public transit projects.\(^6^4\) This activities and projects can include capital projects, operating costs of equipment and facilities used in public transportation, or the acquisition of public transportation services. Federally recognized tribes are allowed to apply, with tribes that are not federally recognized are allows to apply to the state as a sub-recipient for funding.

5.6.20 Safety Research and Demonstration Program
As part of a larger safety research effort by the USDOT, the Safety Research and Demonstration Program provides technical and financial support for transit agencies.\(^6^5\) This support allows for transit agencies to pursue innovative approaches to eliminate or mitigate safety hazards.

The program focuses on demonstration of technologies and safer designs, with goals of:

- Advancing development of materials, technologies and safer designs to reduce collisions and fatalities, as well as mitigate the severity of transit-related injuries.
- Increasing the knowledge about the interface between machinery and people -- both transit workers and passengers -- and reduce the potential for safety-related incidents.
- Improving the safety culture at transit agencies, including stakeholder coordination and outreach.
- Supporting development of transit safety standards, protocols and best practices.

5.6.21 Transit Cooperative Research Program
The Transit Cooperative Research Program (TCRP) – Section 5313 is an applied, contract research program.\textsuperscript{66} This research program develops near-term, practical solutions to problems facing transit agencies. In order to promote operating effectiveness and efficiency in the public transportation industry, the TCRP conducts research designed to solve operational problems, adopt useful technologies from related industries, and introduce innovation that provides better customer service. This program is industry-drive and serves as a means by which the transit industry can develop innovative short-term solutions to meet its demands.

5.6.22 Zero Emission Research Opportunity
The objective for Zero Emission Research Opportunity (ZERO) is to work with the public transportation industry to solve challenges, increase efficiency, and reduce the costs and risk of deploying zero-emission vehicles in transit service according to the FTA.\textsuperscript{67}

5.7 State Grants

5.7.1 Beaches Management Funding Assistance Program
The Beaches Management Funding Assistance Program is hosted by the Florida Department of Environmental Protection (FDEP) to provide and manage grants to local governments for planning and implementation of beach and inlet management projects. These projects should protect upland structures and infrastructure, to provide critical habitat for threatened and endangered species, to provide opportunities for recreation, and to support tourism efforts in the local economy.

For projects to be considered eligible for funding, they can include:

- Beach restoration and nourishment activities
- Project design and engineering studies
- Environmental studies and monitoring
- Inlet management planning
- Inlet sand transfer
- Dune restoration
- Beach and inlet protection activities
- Other beach erosion prevention related activities consistent with adopted Strategic Beach Management Plan.

Projects must also be accessible for public use and listened within an area listed as critically eroded. Applications should be submitted through File Transfer Protocol in the FDEP website.

5.7.2 Economic Development Transportation Fund
The Economic Development Transportation Fund (EDTF), or “Road Fund”, is a program funded by the Florida Legislature as an inducement for the location, expansion, and/or retention of qualified business and industrial projects to the state of Florida. Transportation projects such as additional access to roads, road widening, grade crossings, or traffic signalizations, can be

---

funded by the state of Florida up to $2,000,000. These transportation projects must be deemed necessary for the location, expansion, and/or retention of a qualified business or industry.

To apply for funding from EDTF, the unit of government responsible for the maintenance and owns the transportation improvement must apply to Enterprise Florida. Companies and businesses that apply must estimate and disclose the capital investment it intends to make in the facility, the number of permanent full-time jobs to be created or retained at the facility, and the average hourly wage for new or retained permanent full-time jobs in order for an application to be considered. Enterprise Florida then determines if an applicant meets the program requirements. Eligible projects are presented to the Office of Tourism, Trade and Economic Development in the State of Florida for funding consideration.

5.7.3 Florida CTD Innovation and Service Development Grant
The Florida Commission for the Transportation Disadvantaged (CTD), an independent commission housed administratively through FDOT, responsible for the coordination of transportation services for older adults, persons with disabilities, persons of low income, and children at risk in the state of Florida.69

The Florida CTD issues the Innovation and Service Development Grant, provided from the Transportation Disadvantaged Trust Fund, is a competitive grant meant to fund projects for the purposes of providing cost-effective, door-to-door, on-demand, and scheduled transportation services.70 These services are meant to meet at least one of three objectives:

- Increase a transportation disadvantaged person’s access to and departure from job training, employment, health care, and/or other life-sustaining services,
- Enhance regional connectivity and cross-country mobility, and
- Reduce the difficulty in connecting transportation disadvantaged persons to a transportation hub and from the hub to their final destination.

---

Applications are submitted to the CTD by mail. Email applications are not accepted by the CTD. Eligible applicants must be a community transportation coordinator (CTC) who has an executed Memorandum of Agreement and a Transportation Disadvantaged Service Plan, or be a transportation network company (TNC) that uses a digital network to connect a rider to a TNC diver who provides prearranged rides.

The Innovation and Service Development Grant is meant to fund a portion of passenger trips provided to eligible non-sponsored transportation disadvantaged individuals. Grantees must provide service before seeking payment for transportation.

Walton County, Florida, was the recipient of the last FYs Florida CTD Innovation and Service Development Grant for more than $1.5 million. The grant funding will be used for a new public transportation system project. The transportation system will have three shuttles, meant to carry 28 passengers each from north Walton to South Walton, with two stops in Freeport and terminals at county and city buildings. Fares will be free for the first three years of opening, as the grant will cover the project’s first three years. However, the county must assume responsibility for the public transportation system after that. Walton County’s public transportation system is an example of an acceptable project for the grant that meets one of the objectives, as this transportation system will connect those in the northern part of the county to jobs and recreation available in the southern part of the county where there is a need for new employees.

5.7.4 **FDEP Clean Vessel Act Grant**

The Florida Department of Environmental Protections (DEP) Clean Vessel Act (CVA) Grant program was created to fund up to 75% of eligible pump-out project costs statewide. These projects can relate to site preparation, the purchase of equipment, installation, operations, maintenance, sewage hauling, and educational outreach.

---

72 FDEP. (2019, August 1). Apply for a CVA Grant. Retrieved from https://florid.dep.gov/rcp/cva/content/apply-cva-grant
While not directly related to transportation infrastructure, the CVA Grant program is related to boating and environmental protections, which may be applicable to communities with large boating and marina facilities.

Anyone applying for a CVA grant must have facilities that provide public access to pump-out equipment, regardless of if the facility is private or not. CVA Grant applications must be submitted through the DEP Grantee Portal, along with any supporting documents.

5.7.5 FDOT State Safety Office Sub-grants
The Florida Department of Transportation State Safety Office provides sub-grants to be awarded to safety partners that undertake priority area programs and activities to improve traffic safety. This includes reducing crashes, serious injuries, and fatalities. These sub-grants are awarded to aid in the development and implementation of programs that are in priority areas for traffic safety. Funding for the sub-grants come from the National Highway Traffic Safety Administration (NHTSA) to states annually based on a formula of population and road miles.

Government agencies, subdivisions of the state of Florida, as well as local governments, law enforcement agencies, places of higher education, school districts, as well as non-profits are all eligible to apply for a sub-grant.

5.7.6 Florida Defense Infrastructure Grant Program
The Florida Defense Infrastructure Grant Program (DIG) supports local infrastructure projects that are deemed to have a positive impact on the value of military installations within the state of Florida. Infrastructure projects include encroachment, transportation and access, utilities, communications, housing, environment, and security. Funding for this Grant comes from the

General Revenue Funds from the Florida Legislature’s General Appropriations Act. The Florida Department of Economic Opportunity (DEO) accepts the applications put forth for this grant.\textsuperscript{74}

Eligible applications must meet the criteria set forth in the Florida Statutes, including:

- Must be an economic development applicant serving in the official capacity of governing board of a county, municipality, special district, or state agency that will have the authority to maintain the project upon completion, and which represent a community or county in which a military installation is located.
- Represent a local government with a military installation or military installations that could be adversely affected by federal actions.
- Agree to match at least 30% of any grant awarded. The matching funds must be received from the identified sources and types indicated in the Project Budget. The term for the matching funds must be concurrent with the Agreement period. Matching funds may consist of “cash contributions” or “in-kind contributions”.
- Prepare a coordinated program of work or plan of action delineating how the eligible project will be administrated and accomplished, which must include a plan for ensuring close cooperation between civilian and military authorities in the conduct of the funded activities and a plan for public involvement. If part of an existing strategic plan, a copy of the plan must be included with the Grant Application.
- Provide documentation describing the potential for changes to the mission of a military installation located in the Applicant’s community and the potential impacts such changes will have on the Applicant’s community.

\textbf{5.7.7 Land and Water Conservation Fund}

The Land and Water Conservation Fund (LWCF) is a fund established by Congress in 1964 to ensure the public has access and opportunity to use outdoor recreation resources for current and future generations. The LWCF provides money to governments on

all levels in order to purchase land, water, and wetlands for resident benefit. LWCF receives funding from non-taxpayer dollars from the Outer Continental Shelf lease revenues. Federal matching grants are administered by the National Park Service in the US Department of the Interior (DOI).

While funding is used to conserve natural, cultural, and outdoor recreation areas for the public permanently, such as improving parks and other recreational areas through rehabilitations and upgrades, the funding can be used to develop and expand existing and future trail systems that link communities together and provide additional recreational opportunities.

In FY2019, Alabama will receive $2,689,167 in funding, and Florida will receive $7,869,846 from the LWCF. Florida administers the program on behalf of the National Parks Service through the Florida DEP to provide grants to local governments. These governments must have a legal responsibility to provide outdoor recreational site and facilities for the public. In order to apply, applications must submit a LWCF grant application to the DEP. Only one application may be submitted during one submittal period, and applications may only include one project side unless it is for the acquisition or development of sandy beach access.

Alabama provides LCWF funding to local governments through the Alabama Department of Economic and Community Affairs (ADECA). In order to apply, applications must have their facility/activity need documented in Alabama’s Statewide Comprehensive Outdoor Recreation Plan. Property to be developed and existing outdoor recreation areas must be owned and operated by the application. Recreation areas must also be well maintained. The application must agree to manage and operate the LWCF assisted area for recreation perpetually, and the applicant must agree to comply with all other laws, rules, and regulations associated with the LWCF.

5.7.8 Florida Small Cities CDBG Program

Florida receives 18 to 26 million dollars annually from HUD for the State CDBG program, which the Florida Department of Economic Opportunity (DEO) calls the Small Cities Community Development Block Grant Program.\textsuperscript{75} To be eligible to receive funding, a city must be identified

by HUD to apply for Small Cities CDBG funding. Additionally, cities with less than 50,000 residents that have not accepted special entitlement status and have not opted to join an entitlement program, counties with less than 200,000 residents, and cities with more than 50,000 residents that have opted out of the urban entitlement program are eligible to apply. Projects must meet one of the following National Objectives in order to be eligible for funding:

- Provide a benefit to low- and moderate-income persons
- Elimination of Slum and Blight
- Address an Urgent Need.

Applications must meet one of four categories: Housing Rehabilitation, Neighborhood Revitalization, Commercial Revitalization, and Economic Development. Economic Development grant applications may be submitted at any time throughout the year, while the other three categories may only be submitted during an annual application cycle. A NOFO is published 30 days prior to the opening of the application cycle on the DEO website. Two copies of the application must be submitted, one to the CDBG Office of the DEO either in person or through the mail, and one electronically.

### 5.7.9 County Incentive Grant Program

The County Incentive Grant Program (CIGP) was created to provide grants to counties in the state of Florida to improve transportation facilities, including transit, that is located on the State Highway System (SHS), or which relieves traffic congestion on the SHS. Funds are distributed by FDOT, and the following criteria for projects applying for CIGP will be evaluated for consideration:

- The extent of how much the project will encourage, enhance, or create economic benefits
- The likelihood that the assistance will enable the project to proceed at an earlier date
- The extent to which the assistance would foster innovate P3s and attract private debt or equity investment

---

• The extent to which the project uses new technology and would enhance the efficiency of the project, such as intelligent transportation systems
• The extent of how much the project helps maintain or protect the environment
• The extent of how the project includes transportation benefits for improving intermodalism and safety

Municipalities may apply to the County they are located for CIGP funding.

5.8 Financing

5.8.1 Florida Competitive Capital Access Program
The Competitive Capital Access Program is a program that assists municipal and local governments with long-term financing. This program is held by the Florida Municipal Loan Council (FMLC). Part of the program is a competitive request for proposals for soliciting banks that are interested in providing financing for new projects or loan/bond refinancings.\(^7\)

5.8.2 Florida State Infrastructure Bank
The Florida State Infrastructure Bank (SIB) is a revolving loan and credit enhancement program. It consists of two different accounts.\(^8\) One account is federally-funded, capitalized by federal money matched with state money as required by law. The second account is the state-funded account, which is capitalized by state money and bond proceeds. The SIB can provide loans and other forms of financial assistance to both public and private entities carrying out or proposing projects eligible for assistance under state and federal law. The public or private entity must fill out an SIB application in order to be considered for a loan.

6 Conclusion

This report identified existing and potential funding sources for consideration in developing the Florida-Alabama TPO 2045 Long Range Transportation Plan. Federal, State, and Local revenue sources were identified. The revenue estimates provided Section 4 will be used in narrowing down the Needs Plan to a Cost Feasible Plan. The financing options listed in Section 5 identified for local government’s consideration as potential funding sources for future transportation infrastructure improvements.
Appendix A: Resolution
RESOLUTION FL-AL 20-03
A RESOLUTION OF THE FLORIDA-ALABAMA
TRANSPORTATION PLANNING ORGANIZATION
APPROVING THE 2045 FLORIDA-ALABAMA LONG
RANGE TRANSPORTATION PLAN
EVALUATION CRITERIA AND FINANCIAL RESOURCES

WHEREAS, the Florida-Alabama Transportation Planning Organization (TPO) is the organization designated by the governors of Florida and Alabama as being responsible, together with the states of Florida and Alabama, for carrying out the continuing, cooperative and comprehensive transportation planning process for the Florida-Alabama TPO Planning Area; and

WHEREAS, the Florida-Alabama Transportation Planning Organization (TPO) approved the Long Range Transportation Plan 2045 Update Scope of Services on February 13, 2019; and

WHEREAS, two tasks in the Long Range Transportation Plan 2045 Update Scope of Services are Evaluation Criteria and Financial Resources; and

WHEREAS, the Evaluation Criteria and Financial Resources were reviewed by a Steering Committee consisting of members of the TPO’s Technical Coordinating Committee, Citizens’ Advisory Committee, and other members of the Transportation Industry, and

WHEREAS the Steering Committee considered and incorporated updated federal and state Guidance, other TPO’s Evaluation Criteria, Department of Transportation and Local Government Revenue Forecasts, and potential Alternative Revenue Sources;

NOW, THEREFORE, BE IT RESOLVED BY THE FLORIDA-ALABAMA TRANSPORTATION PLANNING ORGANIZATION THAT:

Passed and duly adopted by the Florida-Alabama TPO on this 12th day of February 2020.

FLORIDA-ALABAMA TRANSPORTATION PLANNING ORGANIZATION

By: 
Sam Parker, Chairman

Appendix B: FDOT Revenue Forecast
2045 REVENUE FORECAST
FLORIDA-ALABAMA TPO
WITH STATEWIDE, DISTRICTWIDE
AND COUNTY-SPECIFIC PROJECTIONS
2045 Forecast of State and Federal Revenues for Statewide and Metropolitan Plans

Overview
This report documents the Florida Department of Transportation (FDOT) revenue forecast through 2045. Estimates for major state programs for this metropolitan area, for FDOT Districts, and for Florida as whole are included. This includes state and federal funds that “flow through” the FDOT work program. This information is used for updates of Metropolitan Planning Organization (MPO) Long Range Transportation Plans (LRTPs) and related documents.

Background
In accordance with federal statute, longstanding FDOT policy and leadership by the Metropolitan Planning Organization Advisory Council (MPOAC), the Office of Policy Planning (OPP) provides projections of future available funding to Florida’s 27 MPOs. This data is known as the Revenue Forecast. Consistent data is being applied to the development of the FDOT Strategic Intermodal System (SIS) Highway Cost Feasible Plan.

The department developed a long-range revenue forecast through 2045. The forecast is largely based upon recent federal legislation (e.g., the FAST Act) and changes in multiple factors affecting state revenue sources and current policies. This 2045 forecast incorporates (1) amounts contained in the department’s work program for FYs 2018 through 2022, (2) the impact of the department’s objectives and investment policies, and (3) the Statutory Formula (equal parts of population and motor fuel tax collections) for distribution of certain program funds. All estimates are expressed in nominal dollars, also known as year of expenditure (YOE) dollars.

Purpose
This version of the forecast (in word processing or portable document format) provides one specific MPO, and all interested parties, with dollar figures that will be necessary and useful as it prepares its 2045 LRTP. If more detail or particular additional numbers are needed, these may subsequently be delivered in spreadsheet format. This document does not forecast funds that do not “flow through” the state work program. Further information concerning local sources of revenue is available from State of Florida sources, particularly Florida’s Transportation Tax Sources: A Primer, and the Local Government Financial Information Handbook.³

¹ In this document, the general term MPO is used to refer to organizations whose names take different forms, including TPO, TPA, and MPO.
This forecast features county level estimates for major FDOT capacity programs, specifically Other Roads and Transit. If an MPO includes more than one county, the county level estimates are totaled to produce an overall MPO estimate. If an MPO’s boundary doesn’t match county boundaries, the FDOT District will determine appropriate funding totals for that MPO. OPP is available for consultation and support, and Districts are asked to share their method and results with our office. However, final responsibility rests with the appropriate District.

There is a long-term goal to focus planning on metropolitan areas which do not correspond to county or city boundaries. In some cases, analyses and plans are based on census designated urbanized areas (UZAs). But for most sources of funding, it is more practical to define geographic areas by county boundaries.

This forecast does not break down SIS Highway expenditures to the county or District level. SIS Highway expenditures are addressed in the SIS Cost Feasible Plan (CFP), which is under preparation by the FDOT Systems Implementation Office. Dist, Districts always inform MPOs of projects that are proposed to be included in the CFP, and, conversely, CFP projects need to be included in the appropriate MPO LRTP(s) to receive federal funding.

This Forecast lists funding for FDOT programs designed to support, operate, and maintain the state transportation system. The FDOT has set aside sufficient funds in the 2045 Revenue Forecast for these programs, referred to as “non-capacity programs” here, to meet statewide objectives and program needs in all metropolitan and non-metropolitan areas. Specific District level amounts are provided for existing facilities expenditures. Funding for these programs is not included in the county level estimates.

**2045 Revenue Forecast (State and Federal Funds)**

The 2045 Revenue Forecast is the result of a three-step process:

1. State and federal revenues from current sources were estimated.
2. Those revenues were distributed among appropriate statewide capacity and non-capacity programs consistent with statewide priorities.
3. County level estimates for the Other Roads and Transit programs were developed, along with County, District or Statewide estimates for other funding categories that are of particular interest to the 27 Florida MPOs.

**Forecast of State and Federal Revenues**

The 2045 Revenue Forecast includes program estimates for the expenditure of state and federal funds expected from current revenue sources (i.e., new revenue sources were not added). The forecast estimates revenues from federal, state, and Turnpike sources included in the Department’s 5-Year Work Program.

The forecast does not estimate revenue from other sources (i.e., local government/authority taxes, fees, and bond proceeds; private sector participation; and innovative finance sources).

Estimates of state revenue sources were based on estimates prepared by the State Revenue Estimating Conference (REC) in September 2017 for state fiscal years (FYs) 2019 through 2028. Estimates of federal revenue sources were based on the Department’s Federal Aid Forecast for FYs 2018 through 2027. In this forecast, Surplus Toll Revenue is only projected for Miami-Dade

---

4 Formerly known as the Systems Planning Office.
County, but that category may apply to more counties in future Revenue Forecasts. Assumptions about revenue growth are shown in Table 1:

### Table 1

**Revenue Sources and Assumptions**

<table>
<thead>
<tr>
<th>Revenue Sources</th>
<th>Years</th>
<th>Assumptions*</th>
</tr>
</thead>
<tbody>
<tr>
<td>State Taxes (includes fuel taxes, tourism-driven sources, vehicle-related taxes and documentary stamp taxes)</td>
<td>2019-2028</td>
<td>Florida R.E.C. Estimates; these average in the range from 2.5% to 3.0% per year</td>
</tr>
<tr>
<td></td>
<td>2029-2045</td>
<td>Annual 1.93% increase in 2029, gradually decreasing to 0.44% in 2045</td>
</tr>
<tr>
<td>Federal Distributions (Total Obligating Authority)</td>
<td>2018-2027</td>
<td>FDOT Federal Aid Forecast</td>
</tr>
<tr>
<td>Turnpike</td>
<td>2018-2028</td>
<td>Turnpike Revenue Forecast</td>
</tr>
<tr>
<td></td>
<td>2029-2045</td>
<td>Annual 1.93% increase in 2029, gradually decreasing to 0.44% in 2045</td>
</tr>
</tbody>
</table>

* Note all growth rates show nominal, or year of expenditure, dollar figures. Consistent with R.E.C assumptions, a constant annual inflation rate of 2.60% is projected forward indefinitely. Therefore, an assumption of nominal growth of 1.93% signifies a real decline of about 0.65% per year.

A summary of the forecast of state, federal and Turnpike revenues is shown in Table 2. The 2045 Revenue Forecast Guidebook contains inflation factors that can be used to adjust project costs expressed in “present day cost” to “year of expenditure” dollars.

### Table 2

**Forecast of Revenues**

**2045 Revenue Forecast (Millions of Dollars)**

¹ Based on the FDOT Adopted Work Program for 2018 through 2022.
² Columns and rows sometimes do not equal the totals due to rounding.
Estimates for State Programs
Long range revenue forecasts assist in determining financial feasibility of needed transportation improvements, and in identifying funding priorities. FDOT policy places primary emphasis on safety and preservation. Remaining funding is planned for capacity programs and other priorities.

The 2045 Revenue Forecast includes the program funding levels contained in the July 1, 2017 Adopted Work Program for 2018 through 2022. The forecast of funding levels for FDOT programs for 2020-2045 was developed based on the corresponding Program and Resource Plan (PRP), which includes the Adopted Work Program and planned funding for fiscal years 2023-2026. This Revenue Forecast provides information for Capacity and Non-Capacity state programs. The information is consistent with “Financial Guidelines for MPO Long Range Plans” moved forward by the Metropolitan Planning Organization Advisory Council Policy and Technical Committee on July 13, 2017.

The Revenue Forecast entails long-term financial projections for support of long-term planning. The forecast is delivered well in advance of the 5-year LRTP adoption schedule, roughly 18 months in advance of the first required adoption. This forecast is considered satisfactory for the remainder of the 5-year cycle; in other words, it is useful for MPOs whose adoptions come at the end of the cycle, about 3½ years after the first MPOs. However, FDOT reserves the right to consider adjustments to the Revenue Forecast during the LRTP adoption cycle, if warranted.

Capacity Programs
Capacity programs include each major FDOT program that expands the capacity of existing transportation systems (such as highways and transit). Table 3 includes a brief description of each major capacity program and the linkage to the program categories used in the PRP.

Statewide Forecast for Capacity Programs
Table 4 identifies the statewide estimates for capacity programs in the 2045 Revenue Forecast. $285 billion is forecast for the entire state transportation program from 2020 through 2045; about $149 billion (52%) is forecast for capacity programs.

Metropolitan Forecast for Capacity Programs
Pursuant to federal law, transportation management area (TMA) funds and certain Transportation Alternatives (TALU) funds are projected based on current population estimates. These 2 categories only apply to federally designated TMAs; 15 of the State’s 27 MPOs qualify for these funds. District estimates for certain Transportation Alternatives (TA) funds and the Other Roads program were developed using the current statutory formula.\(^5\) For planning purposes, transit program funds were divided between Districts and counties according to population.

\(^5\) The statutory formula is 50% population and 50% motor fuel tax collections.

* Estimates for 2018 through 2022 are contained in the FDOT Adopted Work Program.
# Other Roads estimates do not include projected funding for the TRIP program of the Federal TMA program (SU Fund Code).
^ Transit estimates do not include projected funding for the Florida New Starts program.

A few programs fund capacity projects throughout the state on a competitive basis. The two most prominent programs for MPOs are the Transportation Regional Incentive Program (TRIP) and the Florida New Starts Transit Program. Formerly, TRIP was referred to as a Documentary Stamp Tax program, but there are currently multiple sources of funding. With the economic recovery, the forecast funding for TRIP is now over five times the level of 5 years ago. Also, amounts for the federally funded TMA program (Fund Code SU) are provided in Table 6, and not included in Table 5. Neither TRIP, Florida New Starts or TMA funds are included above.

</tr>
</thead>
</table>

Projects which would be partially or entirely funded by TRIP or FL New Starts cannot be counted as “funded” in LRTPs. This is because there is no guarantee of any specific project receiving TRIP or FL New Starts funding in the future. Both programs are competitive, and only a small percentage of potentially eligible projects receive funding. However, these projects can be included in LRTPs as “illustrative” projects. If MPOs have specific questions, they should consult with their District liaison and planning staff; District staff will contact the OPP, Work Program, or other Central Office staff as needed. Conditional estimates of TRIP funds by District are in Table 7. Statewide estimates of FL New Starts funds are in Table 8.

The FAST Act continued funding for Transportation Alternatives projects. Categories impacting MPOs include funds for (1) Transportation Management Areas (TALU funds); (2) areas with populations greater than 5,000 up to 200,000 (TALL funds), and (3) any area of the state (TALT funds). Estimates of Transportation Alternatives Funds are shown further below in Table 9.

Other projects for which funding is uncertain may also be included in LRTPs as “illustrative” projects.

Non-Capacity Programs
Non-capacity programs refer to FDOT programs designed to support, operate and maintain the state highway system: safety, resurfacing, bridge, product support, operations and maintenance, and administration. Table 10 includes a description of each non-capacity program and the linkage to the program categories used in the Program and Resource Plan.

County level estimates are not needed for these programs. Instead, FDOT has included sufficient funding in the 2045 Revenue Forecast to meet the following statewide objectives and policies:

- **Resurfacing program**: Ensure that 80% of state highway system pavement meets Department standards;
- **Bridge program**: Ensure that 90% of FDOT-maintained bridges meet Department standards while keeping all FDOT-maintained bridges open to the public safe;
- **Operations and maintenance program**: Achieve 100% of acceptable maintenance condition standard on the state highway system;
- **Product Support**: Reserve funds for Product Support required to construct improvements (funded with the forecast’s capacity funds) in each District and metropolitan area; and
- **Administration**: Administer the state transportation program.
The Department has reserved funds in the 2045 Revenue Forecast to carry out its responsibilities and achieve its objectives for the non-capacity programs on the state highway system in each district and metropolitan area. Table 11 identifies the statewide estimates for non-capacity programs. About $136 billion (48% of total revenues) is forecast for non-capacity programs.

<table>
<thead>

Table 12 contains District-wide estimates for State Highway System (SHS) existing facilities expenditures for information purposes. Existing facilities expenditures include all expenditures for the program categories Resurfacing, Bridge, and Operations and Maintenance (O&M). In the previous Revenue Forecast, these expenditures were described as SHS O&M, but the expenditures on the Resurfacing and Bridge categories, in combination, are about as much as those for O&M. These existing facilities estimates are provided pursuant to an agreement between FDOT and the Federal Highway Administration (FHWA) Division Office.

Advisory Concerning Florida’s Turnpike Enterprise

Within the framework of FDOT, Florida’s Turnpike Enterprise (Turnpike) is given authority, autonomy and flexibility to conduct its operations and plans in accordance with Florida Statute and its Bond Covenants. The Turnpike’s traffic engineering consultant projects Toll Revenues and Gross Concession Revenues for the current year and the subsequent 10-year period, currently FYs 2018-2028. The consultant’s official projections are available at http://www.floridasturnpike.com/documents/reports/Traffic%20Engineers%20Annual%20Report/1_Executive%20Summary.pdf.

Projections of Turnpike revenues within the State of Florida Revenue Forecast beyond FY2028 are for planning purposes, and no undue reliance should be placed on these projections. Such amounts are generated and shared by the FDOT Office of Policy Planning (OPP) for purposes of accountability and transparency. They are part of the Revenue Forecast process, which serves the needs of MPOs generating required Long Range Transportation Plans (LRTPs).

MPOs do not program capital projects or make decisions concerning Turnpike spending. OPP projections are not part of the Turnpike’s formal revenue estimating process and are not utilized for any purpose other than to assist MPOs and perform related functions. Such amounts do not reflect the Turnpike’s requirement to cover operating and maintenance costs, payments to bondholders for principal and interest, long-term preservation costs, and other outstanding Turnpike obligations and commitments.

MEMORANDUM

TO: Mr. Austin Mount, Executive Director, West Florida Regional Planning Council
    Southwest Region Engineer and Region Local Transportation Engineer
    Clint Andrews, Planning and Program Management Team Leader, FHWA-AL
    Keith Melton, Director, Office of Planning and Program Development, FTA-Region 4

FROM: D.E. (Ed) Phillips, Jr., State Local Transportation Engineer

ATTN: Mary-Beth Washnock

RE: MPO Long-Range Transportation Plan

As part of the comprehensive, cooperative, and continuing transportation planning process, a Metropolitan Planning Organization (MPO) is required to develop a Long-Range Transportation Plan (LRTP) every five years. In Alabama, LRTPs will forecast transportation projects for a 25-year (FY-2045) horizon. The program of projects over that time is expected to be fiscally constrained, meaning the cost of projects in the LRTP cannot exceed funding that is “reasonably expected to be available (23 CFR 450.324).”

The MPO should work with the Alabama Department of Transportation Region office to determine what projects will be eligible for funding. All planned transportation projects located in the metropolitan planning area should be included in the long-range transportation plan, regardless of funding source.

This includes:

- All projects receiving funding from the Federal Highway Administration
- All projects receiving funding from the Federal Transit Administration
- Regionally Significant Projects as defined by 23 CFR 450.104

Below is a summary of funding availability for the MPO’s 2045 Long-Range Transportation Plan.

Capacity – Projects to be included in the FY2020-2023 Transportation Improvement Program can be obtained from the ALDOT CPMS Portal. ALDOT anticipates allocating $3,528,000 in Federal funds for Capacity Projects within the MPO for fiscal years 2024 through 2045. Please coordinate with your ALDOT Region to ensure that your financially constrained project table, generated from CPMS, is limited to the anticipated allocation.

Operations and Maintenance (O&M) – Projects included in the FY2020-2023 Transportation Improvement Program can be obtained from the ALDOT CPMS Portal. ALDOT anticipates allocating $6,712,446 in Federal funds for O&M Projects within the MPO for fiscal years 2024...
through 2045. Please coordinate with your ALDOT Region to ensure that your financially constrained project table, generated from CPMS, is limited to the anticipated allocation.

MPO Dedicated – ALDOT anticipates allocating $154,765 annually in Federal funds for MPO Dedicated Projects. Please notify your ALDOT Region of any MPO dedicated funded projects you wish to include in your LRTP so that the ALDOT Region may enter those projects into CPMS.

Please contact Michael Hora at 334-242-6517 or horam@dot.state.al.us for more information.
